

## How to make butterflies out of plastic bottles:

- Cut 3cm wide strips of a plastic bottle, trace a butterfly and cut it out.
- Use Sharpie pens to colour the wings in beautiful colours.
- Cut some wire about as long as your hand.
- Fold the wire in 2 and thread on some beads.
- Fold it around the body of the butterfly and twist together to secure it.
- Form the antennae by curling the wire ends.
- Put some blue-tack behind the body to be able to stick them to the window.
