

How to make a necklace out of plastic flowers:

- Cut out 3cm wide strips of coloured plastic bottles and draw 4 petal flowers on them, using the template.
- Cut them out and use Sharpie pens to add extra colour.
- Use a tweezer to grip one of the petals and make the other petals curl by warming them above a tea light.
- Create a hole in the middle by warming up a pushpin or needle and push through the middle, using cover underneath.
- Create 5 to 7 flowers and thread them on elastic cord with 3 to 5 beads in between.
- See the diagram below how to make a knot with the elastic cord to fasten the necklace.
